## CD34 Recombinant Protein

### Product Specifications

<b>Catalog Number:</b>	908-290
<b>Protein Species:</b>	Human
<b>Application Notes:</b>	<b>ELISA:</b> Yes <b>Inhibition Assays:</b> Yes <b>WB:</b> Yes
<b>Format:</b>	Recombinant full length human CD34 protein expressed in <i>E. coli</i> , in 50 mM Tris-Acetate, pH 7.5, 1 mM EDTA, 20% glycerol
<b>Concentration:</b>	See product label
<b>Storage:</b>	Store at or below -20°C
<b>Related Products:</b>	905-154 CD11a Monoclonal Antibody 908-284 CD10 Peptide

### Background:

CD34, a single chain transmembrane glycoprotein, is selectively expressed in human lymphoid and myeloid hematopoietic progenitor cells. Staining for CD34 has been used to measure angiogenesis, which reportedly predicts tumor recurrence.
